

Stakeholder Analysis

Project: E-Commerce Delivery Performance Analysis

1. Stakeholder Overview

Stakeholder	Role / Interest	Information Needed	Decision Supported
Operations Manager	Primary stakeholder; responsible for delivery operations	Overall delivery KPIs, delayed-order volume, customer-state performance, average delay	Which geographic areas should be prioritised for operational investigation?
Customer Experience Manager	Understands customer satisfaction and experience	Review scores for delayed vs on-time orders; low-rating patterns	Is delivery performance associated with lower customer ratings?

2. Stakeholder Requirements

Operations Manager – Primary

- On-time delivery rate
- Delayed delivery rate
- Delayed-order volume
- Delivery performance by customer state
- Average delay days

Key decision: Which areas should be prioritised for further operational investigation?

Customer Experience Manager – Secondary

- Average review score for delayed orders
- Average review score for on-time orders
- Comparison of customer satisfaction between the two groups

Key decision: Is delivery performance associated with customer ratings?

3. Stakeholder-to-Business Question Mapping

Stakeholder	Business Question
Operations Manager	What is the overall delivery performance?
Operations Manager	Where are delivery delays concentrated geographically?
Customer Experience Manager	Are delayed orders associated with lower customer ratings?
Operations Manager	Which areas should be prioritised for further investigation?
