

Business Requirements Document (BRD)

E-Commerce Delivery Performance Analysis

1. Business Requirements

ID	Business Requirement
BR-01	The business needs to measure overall delivery performance using on-time and delayed-delivery rates.
BR-02	The business needs to identify geographic locations with relatively high delivery-delay volume and/or rates.
BR-03	The business needs to assess whether delivery delays are associated with customer review ratings.
BR-04	The business needs to identify priority areas for further investigation using delivery performance and customer impact.

2. Functional Requirements

ID	Functional Requirement	Related BR
FR-01	The solution shall calculate overall on-time delivery percentage and delayed-delivery percentage.	BR-01
FR-02	The solution shall allow delivery performance to be analysed by customer state.	BR-02
FR-03	The solution shall compare average customer review scores between delayed and on-time delivered orders.	BR-03
FR-04	The solution shall support identification of priority geographic areas using delayed-order volume, delay rate, average delay, and customer impact.	BR-04

3. Acceptance Criteria

FR-01 – Delivery Performance

- On-time % and delayed % are calculated from eligible delivered orders.
- Delivery status uses the agreed business rule.
- The dashboard displays the delivery KPIs clearly.

FR-02 – Geographic Analysis

- Delivery performance can be compared by customer state.
- Delayed-order volume and delay rate can be used to compare locations.

FR-03 – Customer Impact

- Orders can be separated into delayed and on-time groups.
- Average review score is calculated for each group at order level.

- The dashboard displays the two average scores side by side.
- The analysis does not claim causation from the comparison alone.

FR-04 – Prioritisation

- Geographic areas can be compared using delivery performance.
- Order volume is considered when evaluating priority.
- Customer rating information is considered as customer-impact evidence.
- Priority areas can be explained using supporting data.

4. Requirement Traceability

Business Question	Business Requirement	Functional Requirement	Output
Overall delivery performance	BR-01	FR-01	Delivery KPI cards / performance visual
Where are delays concentrated?	BR-02	FR-02	State-level delay analysis
Are delayed orders associated with lower ratings?	BR-03	FR-03	Average review score comparison
Which areas should be prioritised?	BR-04	FR-04	Priority insights and recommendations
